Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1 thru 76 are rejected under 35 U.S.C. 102(e) as being anticipated by Sumiyoshi et al. '134A. Sumiyoshi discloses (see figures 1 and 2) an electro-optical device comprising a substrate 101, second substrate 201; a thin film transistor comprising a polysilicon (polycrystalline) semiconductor layer (source, drain, and channel regions); gate insulation film 105, insulation film 107, contacts (conductive film) 108, 109, insulation flattening film (organic resin film) 110, and display electrode (pixel electrode) 111. It was inherent that the polysilicon semiconductor layer exhibits a peak of Raman spectra, displaced from a peak of single crystalline silicon to the lower frequency direction since it was well known in the art that less crystalline structures have a lower peak than single crystalline silicon. For example, polysilicon has a peak of Raman spectra of 520 cm^{-1} as opposed to 522 cm^{-1} (the peak of single crystalline silicon as disclosed by the applicant on page 14, middle paragraph). Also, see *Prior Art* paragraph below.

Prior Art

3. The prior art of made of record and not relied upon is considered pertinent to applicant's disclosure. See, for example, Gyoda '616 B1 where it clearly states in column 2, lines 49-63 and in FIG. 9 that polysilicon has a Raman spectrum peak of of 520.00 cm^{-1} .

Response to Arguments

4. Applicant's arguments with respect to claims 1-76 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
